17 May 2017, DRESDEN NEXUS CONFERENCE

Identifying Perceived Characteristics and the Collective Attribution of Values and Meaning from Social Media

X.2 New and Refined Approaches Supporting the Implementation of a Nexus Approach

Dr.-Ing. Alexander Dunkel, TU Dresden, Department of Geosciences, Cartographic Communication

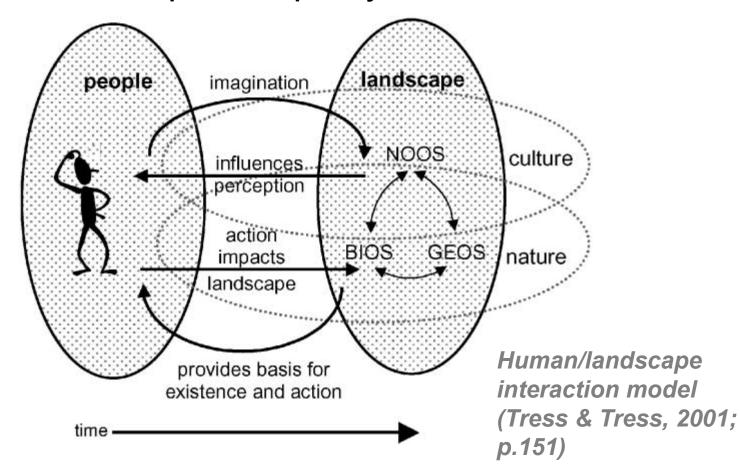

Motivation

EU Landscape Convention:

... landscape "as a zone or area as perceived by local people or visitors" (ELC art. 1, para. 38).

Landscape and perception (= valuation) of the landscape are inseparably intertwined.

Challenge

Nexus Approach

Social Media

as a **supplementary** source for understanding human behavior

Simple base data (4 facets): Location (Where?) User origin (Who?) Tags (What?) Time (When?)

→ Allows for extensive analysis, visualization & reasoning

72 Million Photo Locations in Europe

A. Dunkel, Source: Flickr, 2007-2017

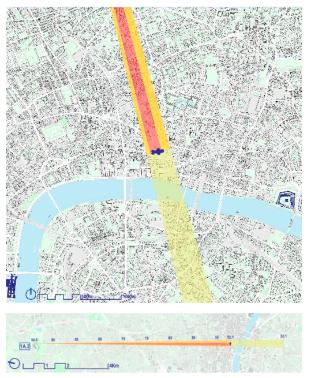

Where:

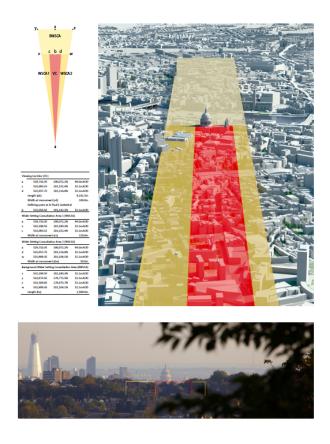

Photo locations

Example: London View Management Framework

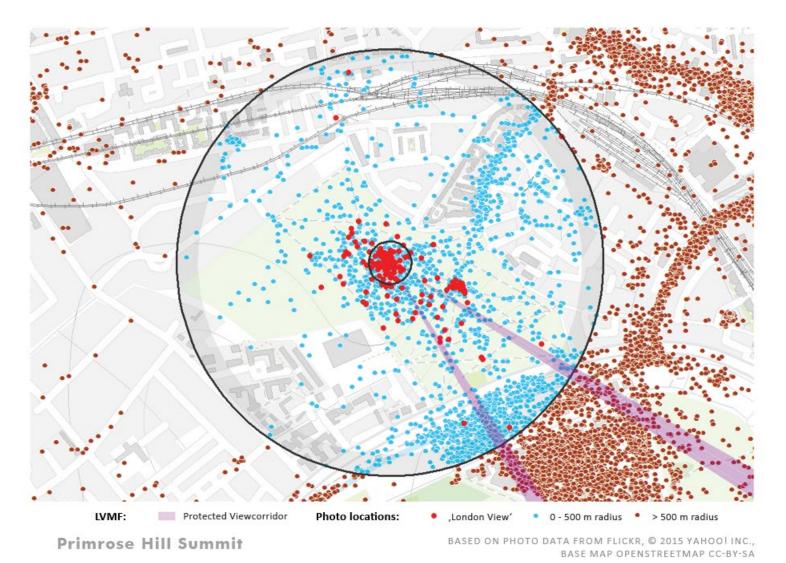

Protected Vista from Assessment Point 1A.2

from: Alexandra Palace: the viewing terrace – approaching from the north-eastern carpark to: St Paul's Cathedral

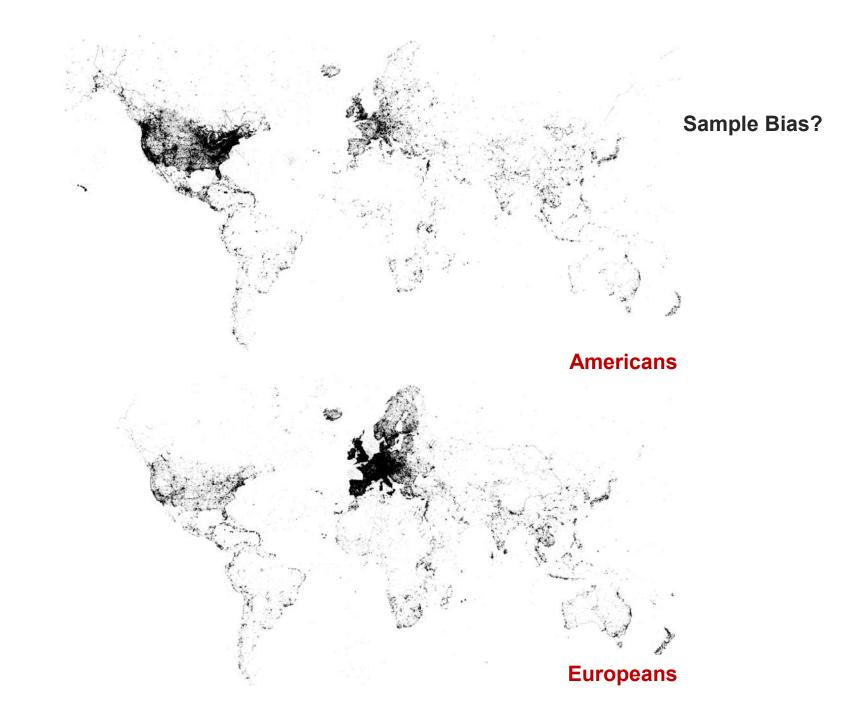

London View (London Greater Authority, 2012) ; Visual Assessment of London's unique Landscape "as a support for visual impact assessment" conducted by experts

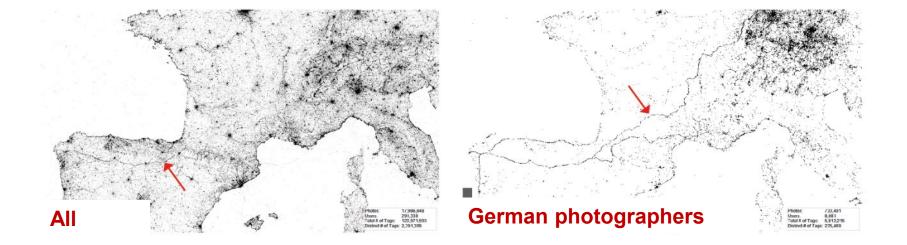

Flickr

All photo locations (blue) and those where people attributed to the view of London (red)

Who: Representativeness "Bias of Data"

Sample Bias?

→ Varying preferences for different routes of the Camino de Santiago based on cultural origin

When: Temporal behavior patterns

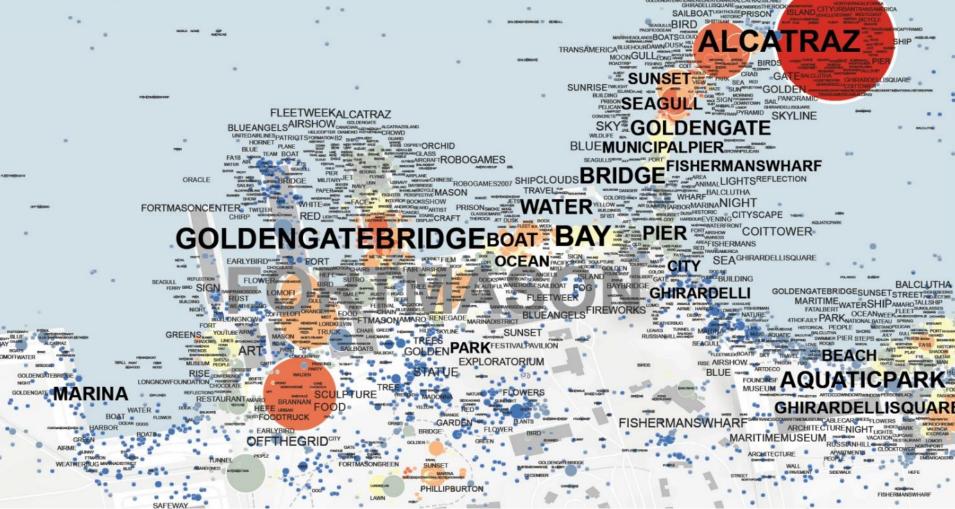

What: (Attribution of meaning) Tags

Spatio-temporal Tag Clouds

ALCATRAZISLAND

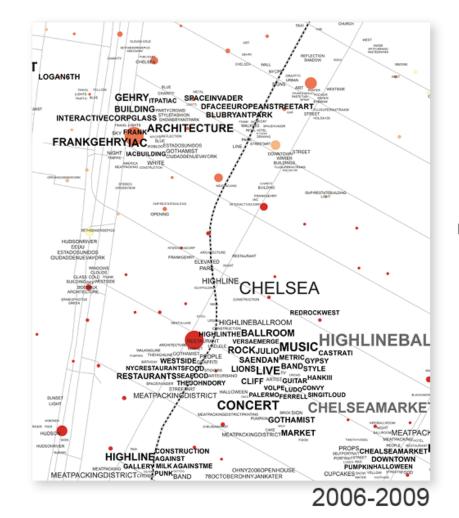

Fort Mason Center, San Francisco

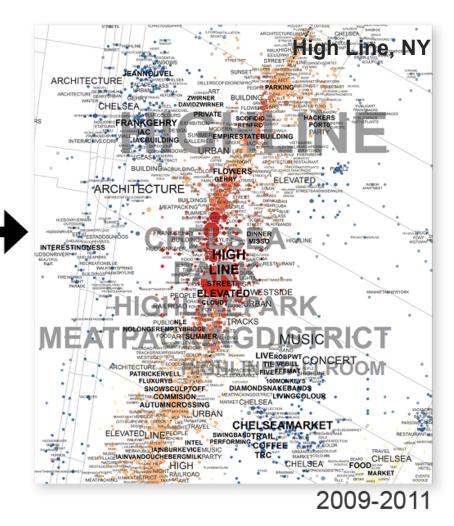

Number of photo locations:	41,777
Number of contributing users:	5002
Total available tags:	197,858
Period (date taken):	2007-2014
